Software Engineer and final-year CSE student at BIT Mesra (CGPA 8.6/10) with internships at PayPal and NS Apps Innovation. Builds full stack and backend systems with Java, Node.js, React.js, REST APIs, and SQL/NoSQL databases, plus Generative AI (LLM APIs, RAG). Shipped JobGrid to 500+ daily users; semifinalist at Flipkart GRiD 8.0 and TCS CodeVita.

Skills

Languages: Java, C++, C, JavaScript, SQL
Backend & Databases: Node.js, Express.js, REST APIs, Microservices, JWT, MySQL, MongoDB, Redis
Frontend & Real-time: React.js, Next.js, Tailwind CSS, Socket.io, Firebase
DevOps & Testing: AWS, Docker, Kubernetes, Terraform, CI/CD, Git, JUnit, TestNG, Playwright, Cucumber (BDD)
AI & Automation: LLM APIs (Groq, Gemini, Claude), Prompt Engineering, RAG, Vector Databases, Claude Code, MCP

Experience

Software Engineer Intern, PayPal – Bangalore, Karnataka, India May 2026 – Aug 2026

- As part of the Credit (BNPL) team, migrated 100+ functional test scenarios from TestNG/RestAssured to Cucumber (BDD).
- Automated multi-tenant API testing in Java with Feign clients across Apache Fineract services, expanding test coverage.
- Eliminated flaky CI failures (down to 0%) by fixing tenant timezone mismatches (UTC vs partner-product timezone) in tests.
- Built a PR reviewer-assignment and workload-checker tool for 23+ repos with automated pending-review DM reminders.
- Integrated Claude into the code review workflow to auto-generate review feedback and change requests on pull requests.

React Developer Intern, NS Apps Innovation – Patna, Bihar, India (Hybrid) Jan 2026 – May 2026

- Designed a contractor ERP platform for materials, costs, bills, and expenses, with a mobile-friendly view for on-site workers.
- Automated delivery of bills and purchase orders to suppliers through WhatsApp API integration, replacing manual sharing.
- Delivered responsive portals and admin dashboards for Bihar Government projects, including Bihar Films, using React.js.
- Developed interactive puzzle games for Bihar Diwas and validated form workflows connected to REST APIs.

Projects

JobGrid – AI-Powered Engineering Job Portal – GitHub | Live Demo Mar 2026

Tech: *Next.js 15, Node.js, Express.js, MongoDB, Groq AI (Llama 3), Telegram Bot, Capacitor*

- Created a full stack job portal for 500+ daily users, ingesting listings from 10+ sources via scrapers and a Telegram bot.
- Engineered Groq (Llama 3) prompts to auto-parse job descriptions into structured filters and AI recommendations.
- Shipped a real-time analytics dashboard, community forum, admin moderation panel, and Capacitor mobile app.

FlexPass – Pay-Per-Use Microservices Marketplace – GitHub | Live Demo Jun 2025

Tech: *React.js, Node.js, Express.js, MongoDB, Redis, Socket.io, JWT, Google OAuth 2.0, Razorpay*

- Architected a pay-per-use marketplace with a unified wallet, Razorpay payments, and usage-based access for 5+ services.
- Applied Redis distributed locking and rate limiting to eliminate wallet race conditions and cut unauthorized logins by 80%.
- Implemented JWT, Google OAuth 2.0, and email OTP authentication with live usage tracking, cutting invalid sessions by 60%.

WhereIsMyBitBus – Real-Time Bus Tracking Platform – GitHub | Live Demo May 2025

Tech: *React.js (Vite), JavaScript, Firebase, Chakra UI, OpenStreetMap*

- Launched a real-time campus bus tracker for 300+ users at BIT Mesra with 98% live location accuracy on OpenStreetMap.
- Delivered 5-second location updates by storing only current coordinates in Firebase, keeping database reads and writes light.

Education

Birla Institute of Technology, Mesra, Ranchi, India 2023 – 2027
B.Tech in Computer Science and Engineering · CGPA: 8.6/10

Achievements

- Semifinalist, Flipkart GRiD 8.0 and TCS CodeVita Global Coding Competition.
